Subject: Riverview Energy T147-39554-00065 unit descriptions
Attachments: ATT00001.txt; 39554 unit descriptions 6-27-18.docx

Good morning,

I have attached a clip of the unit descriptions for the source. There are a few unresolved points, like controls for some coal handling equipment, details of wastewater treatment processes, and I need to complete the identifiers we put in the description section for the NSPS and NESHAPs. I am pretty sure that the process equipment is all there and the capacities are up to date.

Please let me know if there are any questions.
